

REFERENCE MARK	ELEVATION (FT.MGVD)	DESCRIPTION OF LOCATION
RM 1	503.65	A Texas Highway Department standard disk, stamped "T 147 Reset 1959", located 1.3 miles southeast along the Southern Pacific Railroad from the station at Jacksonville, at the U.S. Highway 69 underpass and set in the top of northwest abutment wall Southern Pacific Railroad Underpass, on north side of railroad tracks.
RM 2*	482.70	A USCGS bench mark disk, stamped "E249 1952", set in the top of a concrete post which projects 0.7 foot above the ground and located 1.1 miles southwest along the Missouri Pacific Railroad from the station at Jacksonville, 2 poles northeast of mile post 26, 39.7 feet northwest of the centerline of U.S. Highway 79.
RM 3	679.89	A USCGS bench mark disk, stamped "D252 1952", set in the top of a concrete post which projects 0.4 feet above the ground and located 0.2 mile northwest along U.S. Highway 69 from the post office at Jacksonville, thence 0.1 mile northwest along FM 347 thence 0.85 mile north along Alberta Street.
RM 4	488.19	A standard dial, stamped "497 9092 162 1934", set in the top of a concrete post and located 1.9 mile east along the Missouri Pacific Railroad from Jacksonville, 450 feet northeast of mile post 29, 350 feet west of light signals 292 & 293, at a farm-road crossing.
RM 5	371.83	A U.S.G.S. shaded square on a concrete culvert from the Ruth Highway, TX (#645) (level No. 7), located on the south side of U.S. Highway 79 - 7.1 miles west of Summerfield - 3.3 miles east of Jacksonville - approximately 1400 feet west of entrance into Cherokee Country Club and approximately 2,200 feet west of Keys Creek.

*Outside Corporate Limits

LEGEND

SPECIAL FLOOD HAZARD AREAS UNDAUNTED BY 100-YEAR FLOOD

- ZONE A No base flood elevations determined.
- ZONE AE Base flood elevations determined.
- ZONE AH Flood depths of 1 to 3 feet (usually area pending); base flood elevations determined.
- ZONE AD Flood depths of 1 to 3 feet (usually of flow on sloping terrain); average depth determined. For areas of shallow flow the velocities also determined.
- ZONE A99 To be protected from 100-year flood Federal Flood protection system or construction; no base elevations determined.
- ZONE V Coastal flood with velocity hazard (v action); no base flood elevations determined.
- ZONE VE Coastal flood with velocity hazard (v action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X Areas of 500-year flood; areas 100-year flood with average depth of less than 1 foot or with drain areas less than 1 square mile; areas protected by levees from 1 year flood.

OTHER AREAS

- ZONE X Areas determined to be outside 5 year flood plain.
- ZONE D Areas in which flood hazards undetermined.

Boundaries

- Flood Boundary
- Floodway Boundary
- Zone D Boundary
- Boundary Dividing Special Flood Hazard Zones, and Boundaries of Areas of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones.

Elevations

- 513 Base Flood Elevation Line; Elevation in Feet*
- (EL 987) Cross Section Line
- Base Flood Elevation in Feet Where Uniform Within Zone
- RM7x Elevation Reference Mark

*Referenced to the National Geodetic Vertical Datum of 1929

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flood particularly from local drainage sources of small size, or all planning features outside Special Flood Hazard Areas.

Areas of special flood hazard (100-year flood) include Zones A, AE, AH, AD, A99, V, VE, and VE.

Certain areas not in Special Flood Hazard Areas may be protected flood control structures.

Boundaries of the floodways were computed at cross sections interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Floodway widths are provided in the Flood Insurance Study Report.

Coastal base flood elevations apply only landward of the shoreline.
